

The Overall Experience

An internship is based on an executive training experience that provides significant, consistent work similar to a student's major or seeking a career. "An internship is a period of work experience offered by an employer to give students and graduates exposure to the working environment, often within a specific industry, which relates to their field of study.

(Allaboutcareers, 2020)"

As a communication major, I learned how to be a successful journalist from professors who mentored me. They took me under their wings to teach me on how to write as a news reporter in a professional manner. They educated me on how to find the people to discuss any topic that could be based on my article. I participated in Worcester Spy which encouraged me to started out as a news writer to be prepare for the Visual and Performing Arts (VPA) Media Internship.

Throughout my internship, I learned how to be a determined person. I also taught myself on how to be disciplined. I gained knowledge as an outspoken person who is not afraid to ask questions, to come with ideas, to be prepared for an interview, and work on my news reporting. I absorb teamwork because I feel good working with other people who could guide me to improve my writing strategies.

This internship helped me to reach my personal goals. It increased my self-confidence to be prepared for the future. It encourage me to find a career in a low-stakes situation which guides me to make wise decisions that last for a lifetime.

This internship inspired me and reach my expectations that reached my career goals. It helped me to gain work experience to be successful and prepare myself to follow my dream job. I want to pursue a career as a music journalist in the *Billboard* and *Rolling Stone* magazine.

I would absolutely recommend this organization to future students. This organization would not only help students gain work experiences, it would help them to pursue their dream job and work on their personal goals to be successful in the communication and mass media industry.
